SKSXP

Medium/Heavy Wire 1 1/2" Stapler

The new SENCO® SKSXP is available for use in a wide variety of wood-working applications. It is offered in a series of models that drive 2 different gauges and 3 different crown widths in lengths from 7/8" – 1-1/2". It is dependable, virtually maintenance free stapler you can depend on for the professional craftsmanship job you demand.

Specifications

Item#	
SKSXP L11-17	300120N
SKSXP M12-17	300152N
SKSXP N12-17	300184N
Reg. Operating Pressure	70-120 psi (4.8 - 8.3 bar)
Air Consumption (60 cycles per min.)	2.16 scfm
Air Inlet	1/4" NPT
Tool Weight	4.2 lbs (1.9 kg)
Height	9.25" (238 mm)
Length	12.38" (312 mm)
Width	3" (76 mm)
Fastener Capacity	145+

Fastener Specifications

Staple Gauge	18 or 16
Crowns	1/4", 3/8", 7/16"
Fastener Range	3/4" (19 mm) – 1 1/2" (38 mm)
Finish	Galvanized & Stainless
Collation	Glued and/or taped strip

Applications

Major: drawer assembly, countertop buildup, cabinets, corner and glue block fastening, and spring clip attachment in furniture assembly. Widely used in assembly of doors and window casings, trim, and moldings. On-site construction uses for aluminum and vinyl siding, underlayment, and attachment of roofing sheathing and decking materials.

Other: light crating, agricultural boxes, fencing, and all types of wood crafts

Features and Benefits

- E-Z Load/E-Z Clear system
- Drives 1-1/2" staples into hard woods
- NeverLube™ design requires no lubrication
- Only 2 moving O-rings
- Quiet operation
- Long 1" lip to get into tight spots

Choose the right actuation model!

Sequential Actuation Trigger (also known as restrictive trigger or trigger fire) operates in the following sequence - depress the safety element at the nose of tool against the work surface then pull the trigger. After each fastener is driven, release the trigger and lift the tool off the work surface before starting the sequence again. This trigger is recommended and acceptable for most applications.

Contact Actuation Trigger (also known as dual action, bounce or bottom fire) operates in the following sequence- pull the trigger first and keep the trigger pulled while moving the tool along the work surface with a bouncing motion, depressing the safety element at the nose of the tool against the work surface where the fastener is to be driven. This trigger is recommended for use by trained professionals only in high production or volume applications.
