

## 10" Professional Cabinet Saw w/52" Glide

# SAVES FINGERS!

SawStop's table saw offers protection against the risk of serious injuries. Its award winning safety system has saved thousands of fingers by being able to detect the difference between wood and the operator.

### *HOW?*

The blade carries a small electrical signal. The human body is conductive so when skin comes in contact with the blade, the signal changes and activates the safety system. An aluminum brake springs into the spinning brake, stopping it. The blade's angular momentum drives it beneath the table, which removes the risk of subsequent contact, and power to the motor is shut off. **All this happens in less than five milliseconds!** In less than five minutes the saw can be reset and back in operation.

#### Specifications for Model #PCS31230-TGP252

- 3 hp, 1ph, 230V, 13 amps
- 69-1/8" w x 33" d x 34" h; 426 lb.
- Includes table extension and below table dust collection with advanced dust shroud
