Desc.	Features a rugged design with "hard hat" rotor protection that provides superior drop and weather protection. Fully automatic self-leveling provides fast, accurate setup. Single cross-axis manual slope mode with cross-axis self-level.	Single grade laser for level, grade and vertical alignment. Digital slope readout. Two-way, full-function remote control to make grade changes from anywhere on the job site for reduced setup time and faster operation. 5 year limited warranty.	Dual grade laser for level, grade and vertical alignment. Digital slope readout. Two-way, full-function remote control to make grade changes from anywhere on the job site for reduced setup time and faster operation.	Offers maximum flexibility by enabling construction professionals to upgrade its capabilities to match their application needs. 5 year warranty, 2 year knock-down warranty.	Four times brighter; 3 head green laser diodes are more visible than red and allow for a greater visible range in interior applications along with better exterior visibility.	2 head red diodes provide great visibility and alignment for wall track layout. Full time pulse mode allows use with detector while maintaining full brightness for visibility and extended range. Rear mounted magnets allow flush attachment to metal track and steel.	3 plane green laser. Up 15 hours runtime on 1 battery charge. Integrated magnetic bracket with micro control and pivots on plumb point. 1-meter impact resistant. 3 year limited warranty.	With spot and cross line capability, use this laser for multiple applications. With an IP65 debris/water resistance rating, 2-meter drop protection and a highly-visible green beam, this laser equips users to work in the toughest conditions.	5 beam laser pointer includes a single lever power switch that locks the pendulum in the off position for added durability and a built-in magnetic pivoting bracket, which mounts easily on metal surfaces.	Self-leveling laser tools that can be used inside and outside for horizontal (level) vertical and plumb alignment projects. Full time pulse mode.
